Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

### DETAILED ACTION

1. This office action is responsive to the response to restriction requirement filed on 11/06/2006.

#### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claim 11 is rejected under 35 U.S.C. 102(b) as being anticipated by Turnbull et al (US patent 6,166,698).

Turnbull et al disclose, in figure 3, an antenna system for communicating with a satellite comprising an antenna element 50, a transmission wire 86 connected to other communication systems, see column 6, lines 6-26. The connector for connecting the transmission wire to the communication is inherent.

4. Claims 11, 12, and 14-16 are rejected under 35 U.S.C. 102(b) as being anticipated by Raymond et al (US patent 5,579,367).

Raymond et al disclose, in figure 1, an antenna system for communicating with satellites comprising a dish antenna 32, a transmission wire 34 connected to a user equipment 30, a motor 36 coupled to the dish antenna, and a control cable for

controlling signal that is sent by the user equipment to the motor to position the dish antenna 32 appropriately, see column 2, lines 29-64.

5. Claims 11 and 13 are rejected under 35 U.S.C. 102(e) as being anticipated by Runyon et al (US patent 6,864,837).

Runyon et al, in figures 1 and 3, an antenna system for communicating with a satellite comprising a phased array antenna 10, see figure 3, a transmission wire, not shown in number, for connecting signal to a remote control station 20. The connector for connecting the transmission wire to the remote control station is inherent.

6. The patents to Thompson, Burks, Lopez, and Rodeffer et al are cited as of interest showing the antenna system similar to that disclosed.
